Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2003163556 to Yano.

Yano discloses a method of detecting an intensity comprising receiving an input signal at an input of a first gain element; and assessing an intensity in response to the time associated with the output signal of the cascade of N gain elements satisfying a fixed value.

Allowable Subject Matter

Claims 28-36 and 39-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-26, 37, 43-47 are allowable over the prior art.

The following is an examiner's statement of reasons for allowance: The prior art fail to disclose, either singly or in combination, a method of and system having an intensity detector having the steps and structural limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
